Project introduction

The program < *Dessert Shop Management System* > is designed to streamline the process of managing a dessert shop, It provides functionality for creating and maintaining shop details adding or removing desserts, and calculating costs.

The system employs an interactive graphical user interface (GUI) to enhance user experience.

The project's GUI provides an efficient and interactive platform for managing a dessert shop.

➤ The Exceptions that we used:

- Unchecked Exceptions:
NumberFormatException: for User input Validation.
- Checked Exceptions:
IOException: manages file-related errors during saving or reading file operations.
- User defined Exceptions:
NegativeNumberException: handles cases where the user Inputs negative values for quantities, ID, or other numeric fields.

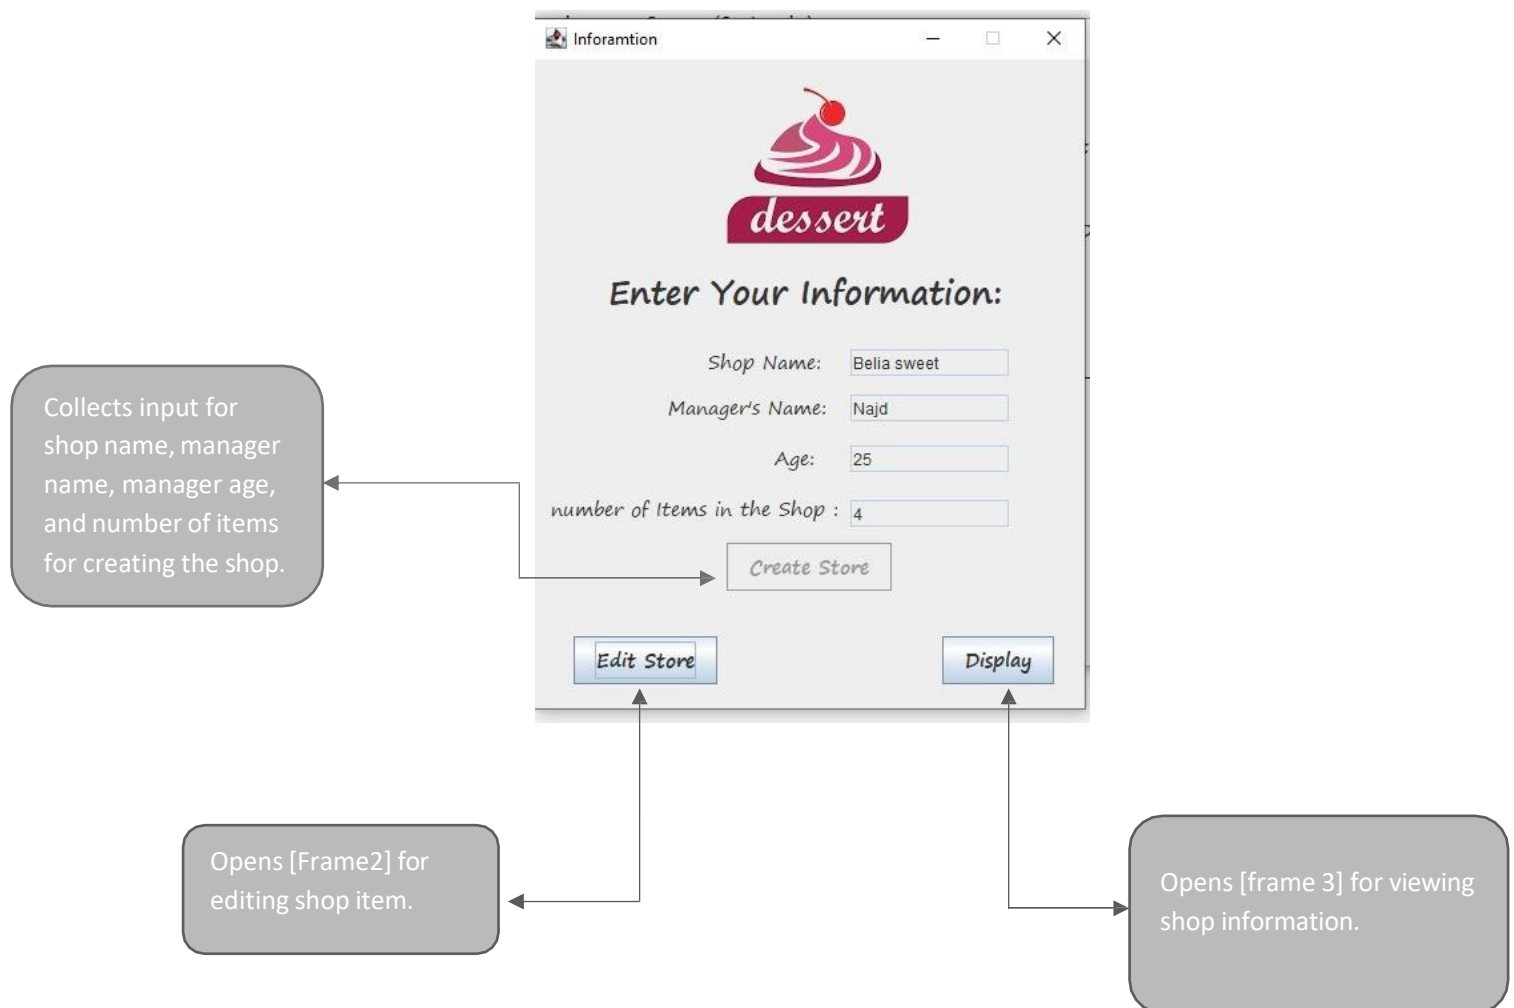

The program uses a text file type (storeInfo.txt) to store the shop's information, including details about desserts, their quantities and total cost.
Data is saved automatically when changes are made.

Frame 1

This is the main frame page, where the user can create store

This frame prominently displays three button :

[Create Store] , [Edit Store] and [Display information] .

Frame 2

The screenshot shows the 'Edit Shop' application window. On the left, the 'Add Dessert' form has two tabs: 'Cake' (selected) and 'Cookie'. Under 'Enter Cake's Information:', there are input fields for 'Enter ID:' (containing '656'), 'Enter Flavor:' (containing 'chocolate'), 'Enter Size:' (with radio buttons for 'Small' and 'Medium', 'Small' is selected), 'Enter Number of Layers:' (containing '3'), and 'Enter Quantity:' (containing '-2'). An 'Add' button is at the bottom. A 'WARNING' dialog box is overlaid in the center, displaying a yellow warning icon and the text 'Please Enter a Positive Number !' with an 'OK' button. On the right, the 'Delete Dessert' form has an 'Enter Item's ID:' field and a 'Delete' button. An arrow points from the 'Delete' button to a text box on the right.

In case of entering a negative number, this message will appear to inform the user to enter a positive number.

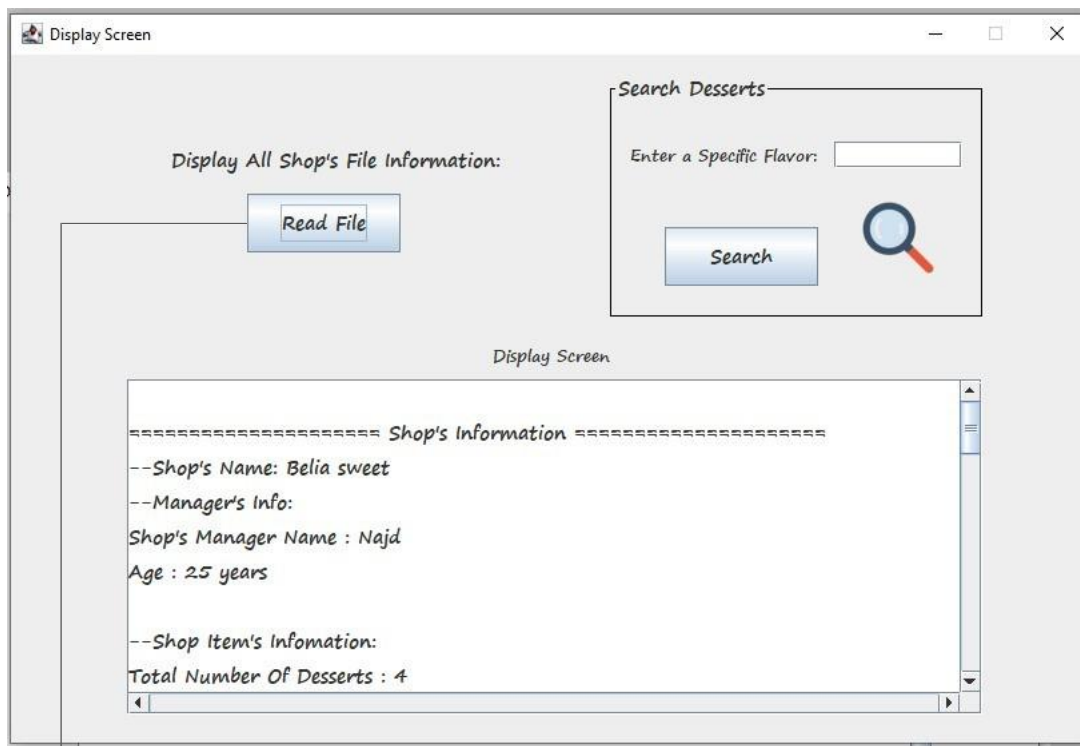

The screenshot shows the 'Edit Shop' application window. On the left, the 'Add Dessert' form has two tabs: 'Cake' and 'Cookie' (selected). Under 'Enter Cookie's Information:', there are input fields for 'Enter ID:', 'Enter Flavor:', and 'Enter Quantity:'. There are also radio buttons for 'Enter Size:' (with 'Small' and 'Large' options). A cookie icon is shown next to the 'Enter Flavor:' field. A checkbox for 'Additional Chocolate Chips' is at the bottom left. An 'Add' button is at the bottom right. On the right, the 'Delete Dessert' form has an 'Enter Item's ID:' field containing '567' and a 'Delete' button. An 'ALERT' dialog box is overlaid in the center, displaying a yellow warning icon and the text 'Either Item's ID is not Found OR item's ID is incorrect' with an 'OK' button. An arrow points from the 'Delete' button to a text box on the right. Another arrow points from the 'ALERT' dialog box to a text box at the bottom.

Enables deletion of desserts by their ID.

In case of Entering ID, number does not exist or an incorrect ID, This message will appear.

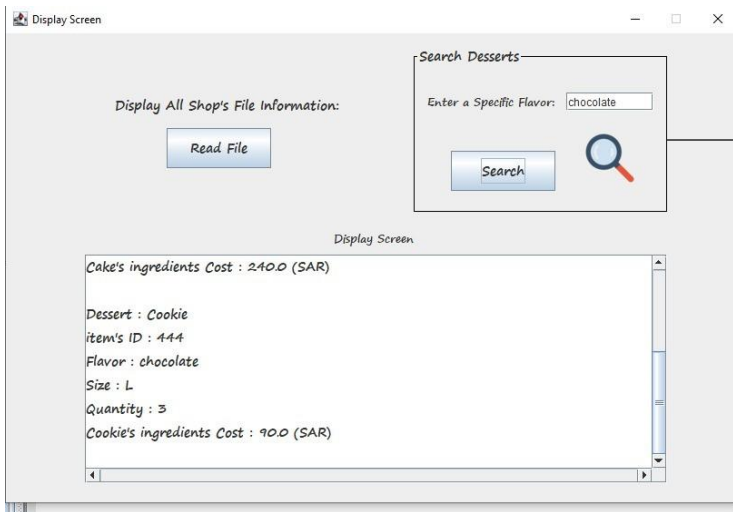

Frame 3

This frame will appear when user click on [display] button in the first frame. It displays shop details and allow searching for desserts based on flavor.

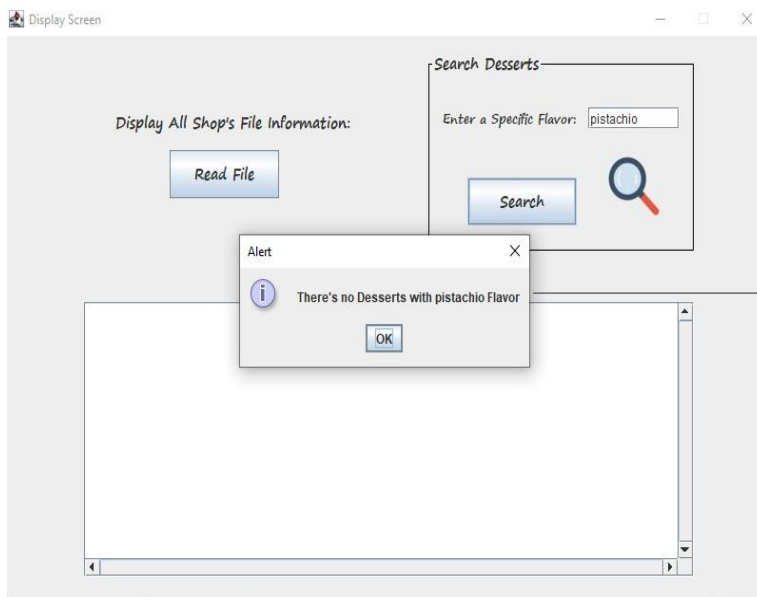

Read shop details from file and displays them.

Frame 3

Search: filters desserts by a specific flavor and displays the result

If an unavailable flavor is entered, this message will appear.
